About the Role

We are looking for a **Software Development Intern** who is passionate about technology and interested in building real-world software systems.

The intern will work closely with experienced engineers to design, develop, test, and troubleshoot software applications. This role provides an opportunity to gain hands-on experience with **software development, backend services, APIs, databases, cloud technologies, and modern development practices**.

Key Responsibilities

- Develop and maintain software components under the guidance of senior engineers.
- Write clean, readable, and maintainable code.
- Develop and consume **REST APIs**.
- Work with databases and perform basic **SQL queries**.
- Debug and troubleshoot application issues.
- Write unit tests and participate in code reviews.
- Work with **Git** and standard software development workflows.
- Learn and work with **Docker and cloud technologies**.
- Collaborate with developers, QA, DevOps, and other engineering teams.
- Participate in design discussions and contribute ideas for improving applications.
- Analyze problems and implement effective technical solutions.

- Document technical changes and development processes.

Required Skills

- Good programming fundamentals in at least one language:
  - **Go**
  - Java
  - Python
  - C++
  - JavaScript/TypeScript
- Understanding of **Data Structures and Algorithms**.
- Basic understanding of **Object-Oriented Programming / software design principles**.
- Familiarity with **REST APIs and HTTP**.
- Basic knowledge of **SQL and databases**.
- Familiarity with **Git/GitHub/GitLab**.
- Good debugging and problem-solving skills.
- Strong willingness to learn new technologies.

Good to Have

- Basic experience with **Golang**.
- Experience building a personal or academic **backend project**.
- Familiarity with **Docker and containers**.
- Basic understanding of **Kubernetes**.
- Exposure to cloud platforms such as **AWS, Azure, or GCP**.
- Familiarity with Redis, Kafka, or other messaging systems.
- Experience with CI/CD concepts.
- Participation in coding competitions, hackathons, or open-source projects.

What We Look For

- Strong programming fundamentals.
- Curiosity and willingness to learn.
- Ability to break down problems and develop solutions.
- Good communication and teamwork skills.
- Attention to code quality and engineering practices.
- Ability to take ownership of assigned tasks.
- Passion for building and understanding how software systems work.

Technology Exposure

Go / Java / Python / C++ | REST APIs | SQL | Git | Docker | Kubernetes | Redis | Cloud | CI/CD
